BRAND 4 LESS

DESKTOP RETAIL SUITE - OFFICIAL USER MANUAL

Point of Sale (POS) | Inventory Management | Customer Khata | Hardware Guide

EDITION: Enterprise Retail Desktop Edition (100% Offline-Ready)

HARDWARE DRIVERS: TSC Label Printer | DTS Thermal Printer | SpeedX Barcode Scanner

1. Overview & Staff Logins

SYSTEM ACCESS

The Brand 4 Less Desktop Retail Suite is a high-speed retail management system designed for clothing, apparel, and retail outlets. It operates completely offline and handles Point of Sale (POS) billing, barcode generation, inventory valuation with Moving Weighted Average Cost (WAC), double-entry customer credit accounts, and native hardware printing.

System Launching & Architecture

- Launching: Double-click the "Brand 4 Less" shortcut icon on your Windows Desktop
- Offline Operation: 100% functional without an active internet connection
- Security: All sales and inventory data are saved locally with automatic transaction protection

Staff Access Roles & Quick Numpad PINs

Cashiers and staff can log in within one second by typing their 4-digit PIN:

ROLE	DEFAULT USER	QUICK PIN	PERMISSIONS & ACCESS
Admin (Owner)	admin	9999	Full control: P&L analytics, staff salaries, backups, settings
Store Manager	manager	5555	Inbound stock, inventory adjustments, customer credit limits
Sales Cashier	cashier1	1234	POS Billing Terminal, barcode scanning, receipt printing

Left Navigation Application Modules

- **Executive Dashboard:** Real-time overview of daily sales, profit margins, receivables, and category performance.
- **POS Billing Terminal:** High-speed cashier counter with SpeedX barcode scanner auto-detection.
- **Customer Records:** Directory of customers, lifetime spend totals, completed orders, and past receipt reprints.
- **Product Inventory:** Garment variant catalog (Size, Color, Cost, Price, Stock) with barcode generator.
- **Purchases & Invoices:** Receiving supplier consignments with Moving Weighted Average Cost (WAC) calculations.
- **Customer Khata Ledger:** Double-entry credit ledger, payment vouchers, and PDF/Excel statement exports.
- **Expenses & Payroll:** Daily petty cash logging, monthly store overhead bills, and staff salary register.
- **Financial Analytics:** Official Profit & Loss (P&L) statements and inventory stock valuation at cost.
- **Settings & Hardware:** Hardware printer tests (TSC/ DTS), scanner diagnostics, and instant database backups.

2. Hardware Setup & Integration Guide

DIRECT DRIVERS

Brand 4 Less includes native drivers for your store equipment. No third-party bridge software is required.

[A] TSC Brand Barcode Label Printer

Supported Models: TSC TE200, TTP-244 Pro, DA210, TC200, MB240 (TSPL Engine)

- **Physical Setup:** Connect power and plug the USB cable into your computer. Insert a roll of 50mm x 30mm (or 40mm x 25mm) sticky garment labels.
- **Gap Calibration (Important):** Turn printer OFF. Press and HOLD the FEED button while turning power ON. Release when it feeds 2 labels. Solid green light = calibrated.
- **Direct Printing:** In Product Inventory, click "Print Barcode Labels" -> Click "[Direct Print (TSC)]" to send raw TSPL vector commands straight to the printer.
- **Self-Test in App:** Go to Settings -> Hardware tab -> Click "[Test TSC Label Printer]" to print a sample test sticker.

[B] DTS Brand POS Thermal Receipt Printer

Supported Models: DTS POS-80, DTS POS-58, Epson ESC/POS Standard Thermal Printers

- **Physical Setup:** Plug USB into the computer and connect the RJ11 cable from your Cash Drawer into the printer port marked "DK". Insert an 80mm thermal paper roll.
- **Checkout Printing:** When a sale finishes in POS, click "[Direct Print (DTS Thermal)]". The printer prints the receipt in under 1 second, cuts the paper cleanly, and kicks open the cash drawer on Cash sales.
- **Self-Test in App:** In Settings -> Hardware tab -> Click "[Test DTS Receipt Printer]" to print a diagnostic test slip and open the cash drawer.

[C] SpeedX Barcode Scanner

Supported Models: SpeedX 1D Laser and 2D Barcode / QR Readers (USB HID Keyboard Wedge)

- **Physical Setup:** Plug the SpeedX USB cable into any free USB port on your Windows PC. It is ready for use in 3 seconds.
- **Zero-Click Global Detection:** You do NOT need to click on any search bar. Simply point the scanner at any garment tag from anywhere on the POS screen and pull the trigger.
- **Automated Actions:** The app detects the barcode in 20ms, sounds an audio confirmation BEEP, adds the exact variant to the cart, and displays a green confirmation banner.

3. POS Billing Terminal & Customers

Cashier Keyboard Shortcuts:

KEY SHORTCUT	ACTION	DESCRIPTION
F1	Focus Search Box	Selects search input to type product name, color, or manual code
F4	Collect Payment	Opens checkout payment window when items are in active cart
F8	Hold Active Cart	Saves current cart in memory when customer picks extra clothes
ESC	Cancel / Close Modal	Closes active checkout popup, receipt preview, or discount modal

Step-by-Step POS Checkout Flow:

- **1. Scan Items:** Scan garment tags with the SpeedX Scanner or select product cards from the category grid.
- **2. Customer Registration:** Type the Customer Name and Mobile Phone (e.g. Usman Tariq, 03001234567). New customers are automatically enrolled in the customer directory upon checkout!
- **3. Discounts (Optional):** Click "Add Discount" to apply a flat PKR amount or percentage deduction.
- **4. Collect Payment:** Press F4. Select Cash (system calculates change), Card, Bank Transfer (IBFT), Khata (Credit), or Split Payment.
- **5. Thermal Receipt:** Click "Confirm & Print Receipt" -> DTS thermal printer prints receipt and opens cash drawer.

Customer Records & Purchase History Module:

- Accessible via "Customer Records" in the left sidebar. The system maintains an aggregated lifecycle profile for every customer:
- **Lifetime Purchase Tracking:** View total completed store visits, total lifetime spend in PKR, and active Khata balance.
 - **Historical Invoice Drawer:** Click "[History]" on any customer row to inspect all past sales bills and items purchased.
 - **1-Click Receipt Reprint:** Click "[Reprint DTS Receipt]" on any past bill to reprint an exact copy on your thermal printer.
 - **Khata Credit Settlement:** Record incoming customer credit payments, print signed vouchers, and export PDF/Excel statements.

4. Inventory, Expenses, P&L & Backups

MANAGEMENT

Product Inventory & Moving WAC Costing

- **Variant Matrix:** Manage garment items with multiple sizes (S, M, L, XL, 30, 32, 34) and colors with individual barcodes.
- **Automatic Weighted Average Cost (WAC):** When receiving new shipments at fluctuating prices, the system recalculates true stock valuation automatically: $WAC = (\text{Old Stock Cost} + \text{New Shipment Cost}) / \text{Total Quantity}$.
- **Barcode Sticker Printing:** Generate 50x30mm retail price stickers with scannable Code-128 barcodes directly to your TSC printer.

Operating Expenses & Staff Salaries

- **Daily Petty Cash:** Record shop expenses (tea, customer refreshments, generator fuel, shopping bags) with instant daily totals.
- **Monthly Overheads:** Track major monthly expenses (Shop Rent, Electricity Bills, Internet) with billing month tracking.
- **Staff Payroll Register:** Register cashiers and sales staff with monthly salaries. Click [Disburse Salary] at month-end to auto-post payout entries.

Financial Analytics & Profit/Loss Statement

- **Trading Profit Statement:** $\text{Gross Sales} - \text{Customer Discounts} = \text{Net Revenue}$. $\text{Net Revenue} - \text{Cost of Goods Sold (COGS at Moving WAC)} = \text{Gross Trading Profit}$.
- **Net Operating Profit:** $\text{Gross Profit} - \text{Operating Expenses (Rent, Bills, Salaries, Petty Cash)} = \text{Net Take-Home Profit}$.
- **Stock Valuation:** Complete audit of total capital invested in inventory at cost vs gross realizable retail value.
- **Excel Exports:** Download official financial spreadsheet reports with one click.

Database Backups & Data Protection

- **1-Second Hot Snapshot:** Go to Settings -> Database Backup -> Click [Create Backup Now]. A complete transactional database snapshot is generated instantly.
 - **USB Flash Drive Copy:** Click [Download] on any backup snapshot to copy the database file to a USB flash drive for safe offline storage.
