

BRAND 4 LESS

DESKTOP RETAIL SUITE — OFFICIAL USER MANUAL

Point of Sale (POS) • Inventory Management • Customer Khata • Hardware Guide

App Edition: Enterprise Retail Desktop Edition

Hardware Compatible: TSC Label Printer • DTS Thermal Printer • SpeedX Scanner

1. Overview & Staff Login

The Brand 4 Less Desktop Retail Suite is an offline-ready, high-speed retail management system designed specifically for apparel, garment, and leftover retail outlets. It integrates Point of Sale (POS) operations, inventory tracking with Moving Weighted Average Cost (WAC), double-entry customer Khata credit accounts, supplier payables, operating expense registers, and native hardware driver support.

System Operation & Launch

- **Launching:** Double-click the "Brand 4 Less" application icon on your Windows Desktop
- **Offline Capability:** 100% functional without an active internet connection
- **Data Security:** Automatic real-time transaction recording with zero cloud dependence

Default Staff Access Roles & Numpad Quick PINs

The system provides instant PIN-based cashier login for fast counter checkout:

Role	Default Username	Quick PIN	Access Scope
Admin (Owner)	admin	9999	Full system control, P&L analytics, backups, staff salaries
Store Manager	manager	5555	Inbound purchases, Khata limits, inventory adjustments
Sales Cashier	cashier1	1234	POS Billing Terminal, barcode scanning, receipt printing

Key Application Modules in Left Navigation Sidebar

- **Executive Dashboard:** Real-time overview of today sales, net trading profit, receivables, and category performance.
- **POS Billing Terminal:** Fast keyboard-driven cash & credit checkout with SpeedX barcode auto-scanning.
- **Customer Records & History:** Customer directory with lifetime spend, order count, and past invoice receipt reprints.
- **Product Inventory:** Garment variant catalog (Size/Color/Cost/Price/Stock) with barcode generator.
- **Purchases & Vendor Invoices:** Inbound supplier bill ingestion with Moving WAC cost auto-calculation.
- **Customer Khata Ledger:** Double-entry credit ledger, payment vouchers, and PDF/Excel statement exports.
- **Operating Expenses & Payroll:** Daily petty cash logging, monthly overhead bills, and staff salary register.
- **Financial Analytics & P&L:** Official Trading Profit & Loss statement and Stock Valuation at Cost (WAC).
- **Settings & Hardware Integration:** Hardware configuration (TSC, DTS, SpeedX) and database backup management.

2. Hardware Setup & Integration Guide

Brand 4 Less features direct, built-in drivers for your store equipment without requiring third-party tools.

1. TSC Brand Barcode Label Printer

Compatible Models: TSC TE200, TTP-244 Pro, DA210, TC200, MB240, and standard TSPL label printers.

- **Physical Setup:** Connect power and plug the USB cable into your Windows computer. Insert a roll of 50mm x 30mm (or 40mm x 25mm) sticky garment labels.
- **Gap Calibration (Important):** Turn printer OFF. Press and HOLD the FEED button while turning power ON. Release when it feeds 2–3 labels. Solid green light = calibrated.
- **Direct Printing:** In Product Inventory, click "Print Barcode Labels" "" Click "[&j Direct Print (TSC)]" to send vector label commands straight to the printer.
- **Diagnostics in App:** Open Settings "" Hardware tab "" Click "[Test TSC Label Printer]" to print a sample test sticker.

2. DTS Brand POS Thermal Receipt Printer

Compatible Models: DTS POS-80, DTS POS-58, Epson ESC/POS, Xprinter, Rongta thermal receipt printers.

- **Physical Setup:** Plug USB into the computer and connect the RJ11 cable from your Cash Drawer into the printer port marked "DK". Insert an 80mm thermal paper roll.
- **Checkout Printing:** When a sale finishes in POS, click "[&j Direct Print (DTS Thermal)]". The printer prints the receipt in under 1 second, cuts the paper cleanly, and kicks open the cash drawer on Cash sales.
- **Diagnostics in App:** In Settings "" Hardware tab "" Click "[Test DTS Receipt Printer]" to print a diagnostic test slip and open the cash drawer.

&j 3. SpeedX Barcode Scanner

- **Physical Setup:** Plug the SpeedX USB cable into any free USB port on your Windows PC. It is ready for use in 3 seconds.
 - **Zero-Click Global Detection:** You do NOT need to click on any search bar. Simply point the SpeedX scanner at any clothing tag anywhere in the POS terminal and pull the trigger.
 - **Automated Actions:** The app instantly detects the barcode, sounds an audio confirmation BEEP, adds the exact variant to the active cart, and displays a green confirmation badge.
-

3. POS Billing Terminal & Customer Records

Cashier Keyboard Shortcuts:

Key Shortcut	Action Function	Description
F1	Focus Search Box	Focuses and selects search input for manual product lookup
F4	Collect Payment	Opens checkout payment modal immediately when cart has items
F8	Hold Active Cart	Stores current cart in memory when customer picks extra items
ESC	Cancel / Close Modal	Closes active checkout, receipt, or discount popups

Step-by-Step POS Checkout Flow:

- **1. Add Items to Cart:** Scan barcode tags with the SpeedX Scanner or click product cards from the category grid.
- **2. Customer Registration:** Enter Customer Name and Mobile Phone (e.g. Usman Tariq - 03001234567). New customers are automatically enrolled in the customer directory upon checkout!
- **3. Discounts (Optional):** Click "Add Discount" to apply a flat PKR amount or percentage discount.
- **4. Payment Methods:** Press F4. Choose Cash (with change calculator), Card/POS, Bank Transfer (IBFT), Khata (Credit), or Split Payment.
- **5. Print Receipt:** Click "Confirm & Print Receipt" "" DTS Thermal Printer prints receipt & opens cash drawer.

Customer Records & Purchase History Module:

- Accessible via "Customer Records" in the left sidebar. The system maintains an aggregated lifecycle profile for every customer who shops at your store.
- **Lifetime Purchase Tracking:** View total completed orders count, total lifetime spend in PKR, outstanding Khata debt, and last visit date.
 - **Purchase History Drawer:** Click "[History]" on any customer to inspect all historical invoices and click "[Reprint DTS Receipt]" to re-print any past invoice anytime.
 - **Customer Khata Ledger:** Record credit payments, print signed vouchers, and export full customer statements to PDF or Excel.

4. Inventory, Purchases, Expenses & P&L

Product Inventory & WAC Costing

- **Variant Catalog:** Manage clothing products with multiple size/color variations, cost prices, retail selling prices, and minimum stock alerts.
- **Moving WAC Formula:** When receiving new supplier shipments at fluctuating costs, the system recalculates Moving Weighted Average Cost: $WAC = (\text{Old Cost} \times \text{Old Qty} + \text{New Cost} \times \text{New Qty}) \div \text{Total Qty}$.
- **Vector Barcode Labels:** Print 50x30mm sticky labels directly to your TSC printer or generate printable vector PDF sheets.

Operating Expenses & Staff Payroll

- **Daily Expenses:** Click "[+ Record Daily Expense]" for store petty cash, tea, refreshments, generator fuel, and packaging shopping bags.
- **Monthly Overheads:** Click "[+ Record Monthly Expense]" with billing month dropdown for Shop Rent, Electricity (LESCO), Internet, and Maintenance.
- **Staff Payroll Register:** Register staff members with monthly salary. Click "[Disburse Salary]" at month-end to auto-post payouts into the expense ledger.

Financial Analytics & Profit/Loss (P&L) Statement

- **Trading Profit Statement:** Gross Retail Sales minus Customer Discounts = Net Revenue. Net Revenue minus Cost of Goods Sold (COGS) = Gross Trading Profit.
- **Bottom-Line Net Profit:** Gross Profit minus Operating Overheads (Rent, Electricity, Salaries, Petty Cash) = Net Operating Profit.
- **Inventory Valuation Audit:** Real-time calculation of total tied-up capital in inventory at cost price vs gross realizable retail value.
- **Excel Report Exports:** Single-click download of official financial spreadsheets formatted with clean headers.

Safe Database Backups

- **Instant Snapshot:** Go to Settings > Database Backup > Click "[Create Backup Now]" to create a clean, encrypted database snapshot.
 - **Offsite Copy:** Click "[Download]" on any snapshot to copy the backup file onto a USB drive for external safekeeping.
-
